About Me

Final-year BCA student at Jamshedpur womens University, with a strong focus on software development, programming, and database management. Passionate about leveraging my technical skills to solve real-world problems and contribute to innovative IT solutions. Seeking an opportunity to apply my knowledge in web development and grow professionally in a dynamic and collaborative work environment.

internships

**Project: Desktop Application for School Management System
Duration: [february 2024] – [june 2024]
Technologies Used: C#, .NET Framework, SQL Server, Windows Forms
Project Overview:
During my internship, I worked on developing a Desktop-based School Management System designed to streamline and automate various administrative tasks in educational institutions. The system allows schools to manage student records, teacher information, class schedules, attendance, grades, and more, all in a centralized platform.**
